**Monitoring**

The PatchGuard connection box facilitates performance monitoring measurements of the PatchGuard™ system. This includes:

- System driving voltage
- Anode current
- Reinforcing steel potential (provided reference cell is used)

The measurements can be taken with a hand held Digital Voltmeter.

**Future Treatment**

Following the initial treatment, the terminals inside the connection box allow the measurements of currents and potentials and allow the option to re-apply DC voltage at any time in the future.

**Dimensions**

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Length</strong></td>
<td><strong>94 mm</strong></td>
</tr>
<tr>
<td><strong>Width</strong></td>
<td><strong>94 mm</strong></td>
</tr>
<tr>
<td><strong>Depth</strong></td>
<td><strong>57 mm</strong></td>
</tr>
</tbody>
</table>

Connection blocks inside the box fit onto a standard DIN rail, which allow customisation to suit specific site requirements.

**Material**

1. Polycarbonate
2. Grey RAL 7035
3. Non flammable
4. IP66 Ingress rating
5. Temperature resistant up to 70°C
6. Glow Wire Test °C: 960
