

TECHNICAL DATASHEET

Polymeric Screw Connector

The screw connector is used in the installation of DuoGuard, PatchGuard Connect and ProtectorJoint corrosion protection systems

Uses

The corrosion resistant screw connector is used in the installation of DuoGuard™, Patchguard Connect™ and ProtectorJoint™ corrosion protection systems to connect the anode to the XLPE coated titanium feeder wire.

Description

The screw connector assembly consists of two parts: a slotted screw and a knurled nut.

The wires to be joined are placed in the slot before the nut is screwed down to create a strong and secure connection for current delivery.

Specification

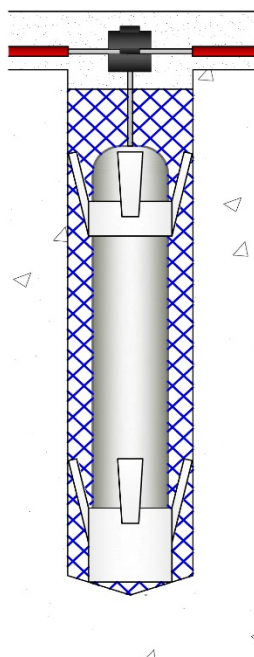

Material	Nylon 6 + 30%GF
Colour	Black
