

CPT Environmental Policy

At CPT we are proud to design and manufacture cutting edge corrosion control solutions for reinforced concrete structures and masonry encased steel framed buildings. From our UK base we manufacture and distribute our unique DuoGuard and PatchGuard systems worldwide.

CPT recognises that in our day-to-day operations we inevitably impact on the environment in a number of ways and are committed to reduce that impact through continual improvement in our environmental performance. To achieve this, we:

- Establish, Implement and Maintain an Environmental Management System (EMS) to meet the requirements of ISO 14001:2015.
- Are committed to the protection of the environment including prevention of pollution.
- Employ systems and procedures that ensure fulfilment of our environmental compliance obligations.
- Put controls in place to protect the environment from any significant environmental aspects and impacts arising from our work activities.
- Minimise the environmental impact, for the life cycle (including disposal), of equipment, and any other physical assets under our control.
- Provide employee training to enhance environmental awareness of our employees, to ensure environmental issues are considered when managing our premises and planning, implementing and undertaking all projects.
- Promote a sustainable approach to business, in partnership with our clients and other stakeholders by conserving energy, minimising consumption, preferring low pollution materials, maximising efficiency, and implementing the Waste Hierarchy.
- Ensure that we integrate sustainability considerations into our wider business strategy and decision making.
- Are committed to continual improvement in our environmental performance, through the implementation of our environmental management system, and the establishment of measurable environmental objectives and targets. These will be monitored and reviewed to evaluate the effectiveness of this environmental policy.
- Ensure fuel consumption and unnecessary emissions are minimised.

This Environmental Policy Statement and the Responsibilities and Arrangements that support it will be reviewed at least annually or more frequently where there have been significant changes to the company or the nature of the company's activities.

Signed

Adrian Roberts
